Pre pressure before solvent extraction

Pre pressure before solvent extraction (pre cooker + flaker / crusher + cooker + Screwpress + Filtration -> Solvent extraction)

Advantages

- Residual oil content in cakes under 1 % after solvent extraction.
- Good quantity of produced oil.

Disadvantages

- Heavy investment.
- Laws and rules very strict.
- Big capacity. The minimum capacity advised depends on the countries: 300 tons per day in a country of Africa, 600 tons per day in France
